PROFESSIONAL SUMMARY

Flutter and Django Developer with hands-on experience building scalable mobile and web applications using Flutter, Dart, Firebase, Django, and Riverpod. Skilled in developing responsive user interfaces, state management, REST API integration, and real-time applications.

EDUCATIONS

B.Tech (Electrical and Computer Engineering)

Sep 2023 - Aug 2027

ABES Engineering College

Class 12th

May 2023

MPS Public School

Class 10th

Sep 2021

MPS Public School

SKILLS

Languages :	Kotlin, Dart, Python, Java, C, SQL
Mobile Development :	Flutter, Jetpack Compose, Android Development, Provider, Riverpod, Hive
Backend & APIs :	Django, Django REST Framework, Firebase, RESTful APIs, JSON, HTTP, FastApi
Databases :	MySQL, PostgreSQL, MongoDB, SQLite
Tools :	Git, GitHub, Android Studio, VS Code, Postman

PROJECTS

Chatter – Real-Time Chat Application

- Developed a full-featured messaging app with real-time chat, user authentication, and message persistence.
- Implemented state management using Riverpod to enhance scalability.
- Integrated Firebase Authentication for secure user authentication and Cloud Firestore for real-time message synchronization.
- Delivered the project in 7 iterative phases, emphasizing async handling, navigation flow, and provider optimization.

Technologies / Tools Used : Flutter, Firebase, Riverpod

HabitFlow – Daily Habit Tracker App

- Built a cross-platform habit tracking app in Flutter with dark glassmorphism UI, featuring habit scheduling, streak tracking, and a weekly progress dashboard
- Implemented Hive for local data persistence and Provider for reactive state management across the Home and Stats screens.
- Designed streak calculation algorithm and integrated fl_chart for day-wise completion visualization with repeatDays filtering
- Added local notifications, swipe-to-delete functionality, time-picker reminders...

Technologies / Tools Used : Flutter, Dart, Hive, Provider, fl_chart, Flutter Local Notifications

EduMarket – Course Marketplace & LMS API

- Engineered a multi-role Learning Management System backend using Django and Django REST Framework (DRF).
- Implemented role-based access control (RBAC) to manage custom permissions for Students, Instructors, and Admins.
- Designed relational schemas with unique constraints for profiles, courses, reviews, and payments.
- Integrated advanced search, filtering, and ordering parameters using django-filter with custom API actions.

Technologies / Tools Used : Django, DRF, Django REST Framework, SQLite, django-filter, Postman

BlogAPI – Blog/CMS REST Backend

- Developed a RESTful Blog/CMS API using Django and DRF, featuring full CRUD endpoints for posts, categories, tags, and comments.
- Implemented JWT authentication, enabling user registration and author-based permissions, allowing only content owners to update or delete their posts.
- Designed visibility rules to ensure anonymous users can view published posts while authors can access their own drafts.
- Integrated filtering, search, ordering, pagination, and automated API tests for core authentication and permission flows.

Technologies / Tools Used : Django, DRF, SimpleJWT, django-filter, SQLite, Postman

AWARDS & ACHIEVEMENTS

Finalist, Hackamania Hackathon (Microsoft Azure Supported)

May 2025

The Elites

Finalist, Hack Genesis '25 (International Hackathon),

Sep 2025

CHRIST University

CERTIFICATIONS

Claude Code In Action

Anthropic

AI Fluency Framework & Foundations

Anthropic

Complete Python Mastery

Code With Mosh

Android Jetpack Compose: The Comprehensive Bootcamp

Udemy

The Complete Android 14 & Kotlin Development Masterclass

Udemy

Learn Java Programming: Beginner to Master
